-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 01 April 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 April 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \*    c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Drawings***

1. Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Admitted Prior Art (FIG. 3).

Regarding claim 1, Applicant's Admitted Prior Art (FIG. 3) teaches an antenna apparatus comprising: a first circularly polarized antenna [301] that efficiently sends and/or receives high-frequency signals in first frequency band, the antenna having a substantially hemispherical radiation pattern; a second circularly polarized antenna [302] that sends and/or receives high-frequency efficiently signals in a second

Art Unit: 2821

frequency band higher than the first frequency band, the antenna having a substantially hemispherical radiation pattern; and a substrate [303, 304], the first circularly polarized antenna and the second circularly polarized antenna being disposed on the front and rear surfaces, respectively, of the substrate, the radiation patterns these two antennas thereby being opposite in direction (See specification pages 3-4 & FIG. 3 of Applicant).

Regarding claim 2, Applicant's Admitted Prior Art (FIG. 3) teaches the antenna apparatus according to Claim 1, further comprising two wiring patterns (See FIG. 3), one being connected to the first circularly polarized antenna [301] on the front surface of the substrate [303], the other being connected to the second circularly polarized antenna [302] on the rear surface of the substrate [304].

Regarding claim 3, Applicant's Admitted Prior Art (FIG. 3) teaches the antenna apparatus according to Claim 2, further comprising at least one coaxial cable [305, 306], the first circularly polarized antenna [301] and the second circularly polarized antenna [302] being connected via the wiring patterns and the coaxial cable, to a communication apparatus (See FIG. 3).

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art in view of Basile (U.S. Patent No. 6,298,243).

Applicant's Admitted Prior Art teaches every features of the claimed invention in paragraph 3, except for a frequency synthesizer.

Basile teaches in figure 1 a frequency synthesizer [404].

In view of the above statement, It would have been obvious to one having ordinary skill in the art at the time the invention was made by using the frequency synthesizer as taught by Basile in order to provide a diplexer to direct the first signals to be transmitted to the first antenna from the coaxial cable and to direct the first and second signals received from the respective antennas, respectively, to the single coaxial cable (See col. 3, line 66 & col. 4, lines 1-4).
